# App Store Description

If you're like us, you keep your iPad® standing by through the day for quick access to everything from music to email. With CooCoo Clock, while the device sits on your desk or side table, it can function as an interactive desktop version of the whimsical cuckoo wall clock.
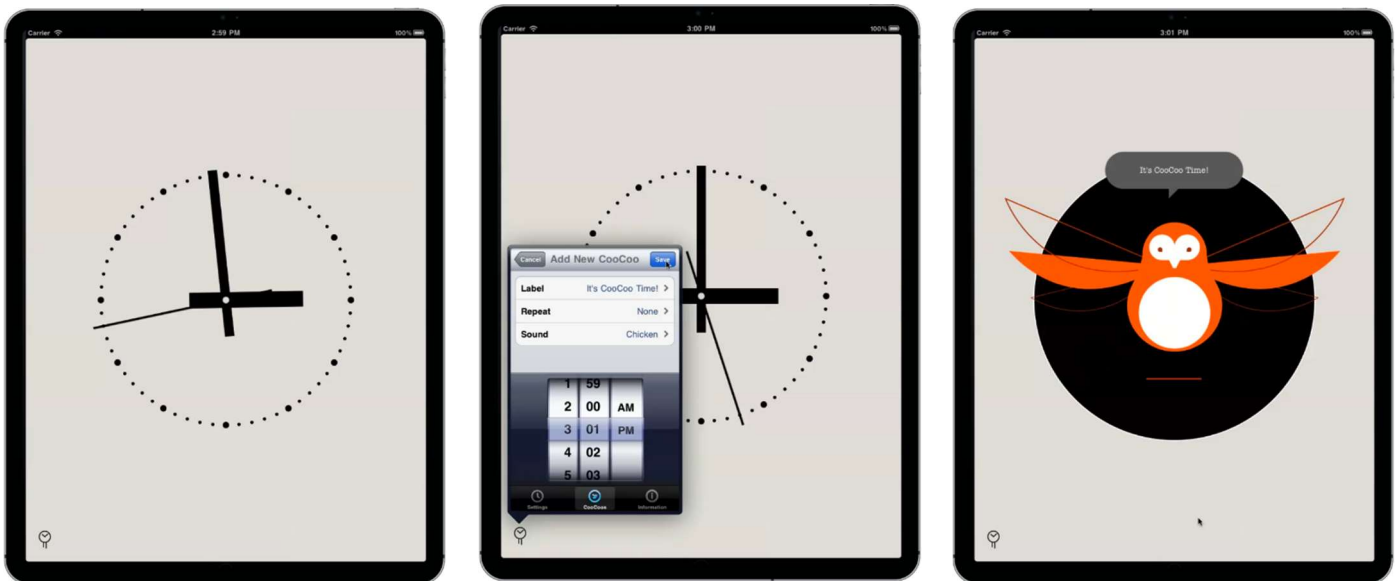

With a dynamically reversing color scheme and a single or "exploded" view clock face, you can specify the times for the CooCoo bird to do his thing and use them as alarms or reminders. Just like a real cuckoo clock, the little bird pops out and makes his famous sound. Only now, you can pick what time the bird cuckoos, how often, and even choose a different bird sound for him to make.

**Features**

- Animated CooCoo bird with sound
- Three bird color options: blue, yellow, and orange
- Four different bird sounds: classic cuckoo, robin, duck, and chicken
- Custom labels for alarms, and optional repeat settings (hourly or daily)
- Set up to 20 different CooCoo alarm times
- Local notifications for when the CooCoo Clock app is not running in the foreground
- Auto-Lock disable: prevents iPad from auto-lock/sleep
- Option for bird to "chirp" on the hour
- Portrait and landscape orientation

From 6 a.m. to 6 p.m., the clock's normal dark-on-light color scheme is visible. It is reversed from 6 p.m. to 6 a.m. And for the "exploded" clock view, you can pinch the screen and move your two fingers apart. To restore the normal clock view, put two fingers on the screen and pinch them together.

If you forget to keep the app running in the foreground when a CooCoo runs, you will receive a local notification with the label text and the sound will play for 30 seconds. You'll be able to simply dismiss the reminder window or jump into the app to see and hear the bird function normally.

## In-App Verbiage

We're glad you chose to install CooCoo Clock on your iPad® and we hope you enjoy using this interactive version of the whimsical wall clock.

If a CooCoo time arrives when the app is running in the foreground, you'll see and hear our fine feathered friend chirp away. The sound and animation will run until you dismiss it. To stop the CooCoo, simply tap the bird.

Bird Color
Chirp On-the-Hour
Disable Auto-Lock

Label
Repeat - every hour, every day, or not at all
Sound - cuckoo, robin, duck and chicken

Disable Auto-Lock
To use CooCoo Clock as a persistent desk clock, or as an alarm clock to see and hear alarms run until you dismiss them, the app must be running in the foreground and your iPad must be "awake" or prevented from Auto-Lock. We recommend keeping your iPad plugged in this situation, as your battery will run down faster.
